Merchandising Updates Completion Checklist

DATE	Initial	Visual Merchandising – Product & Collateral
		- Graphics, collateral, and pricing are placed according to instructions Outdated collateral & graphics were discarded according to discard list Product is placed according to the MCS assortment and/or instructions - Product is front facing, straight, and pulled forward
DATE	Initial	Visual Standards – Pride & Hygiene
		- Testers are created, properly displayed, clean & hygienic, and with caps removed (if applicable) “Try Me” stickers are placed according to standard on all testers - Fixture is clean and free of dust, hair, residue, smudges, etc Standards were followed with Specialized Luxe Brands (i.e. La Mer, Tom Ford Private Blend, Jo Malone) Sephora Mix > Library > Policy & Procedures > Onstage Operations
DATE	Initial	Inventory – Stock Levels
		- Fixture is perceived full with appropriate customer facing stock levels - All off assortment product has been removed - Additional stock is stored in bottom drawer for mid-day up-stocking - Understock drawers are organized according to drawer standards

Flexing Guidelines

- If the designated product isn't available, substitute with a **similar end-use** adjacent product of the **same brand**
- Adjacent products of the **same brand** can also be double exposed to create a full look
- Ensure pricing and naming are updated to reflect substituted display (only P-Touch when absolutely necessary)
- If substitutions aren't available OR when merchandising fixtures with custom drilled acrylics:
 - Keep the tester on display for clients to continue to try (if available)
 - Use a “Gone Boing” to direct clients to purchase the product onlineA

Hotline Online Paths

Use the “Merchandising Updates” path if:

- If an item arrived damaged
- If an item in the “New Components + Graphics List” was not included
- If it has been less than two weeks since the execution start date
 - NOTE: When submitting a HLOL, validate if the update type is single or multi branded as noted in the instruction's header

Use the “Existing Fixtures & Components or Graphics” path if:

- If it has been more than two weeks since the execution start date
- If you need existing collateral that **was not new** to the update
- If an item was damaged in store

HLOL Best Practices

- Use “New Graphics & Components in Box” to identify part names, part numbers, and vendors
- Submit separate requests for collateral from different vendors
- Take pictures of items that arrived damaged in the packaging
- Attach large, clear pictures to your hotline requests – most requests cannot be processed without photos
